

Title	Thermal and multispectral data from field trials evaluation the relationship between grain protein, nitrogen and crown rot		
Abstract	Thermal, multispectral and visual Data for optimum management of Fusarium crown rot infected high protein wheat across multiple N management strategies - Field Trials. Folder contains raw imagery of two years of field experiments across three trial sites exploring the yield and quality responses of fusarium crown rot infect wheat. Flight information can be found within each flight’s property data. For further harvest data see BLG212.
