

Title	Impact of Fusarium crown rot and nitrogen management strategies on APH and bread wheat varieties.
Abstract	Replicated field experiments at three locations in northern NSW with 3 APH bread wheat varieties and 3 durum wheat varieties grown in the presence and absence of Fusarium crown rot infection under 4 nitrogen management strategies and two rainfall scenarios (dryland vs supplementary irrigation). 288 plots/field site. Data set contains establishment, tiller density, yield and grain quality measurements (protein and screenings).
