

Title	Field evaluation of fungicide seed treatment on yield in winter cereals 2019 - 2021
Abstract	Replicated field experiments on yield impact of a range of fungicide seed treatments on yield loss from the fungal disease Fusarium crown rot across environments in central and northern NSW. Data sets contain harvest yield data from 13 replicated field experiments conducted over three seasons on the effect of various fungicide seed treatments on yield of wheat, barley and/or durum wheat varieties in the presence and absence of inoculation with Fusarium crown rot.
